Profile

Competetive coder with experience in many languages like **Java** (experience 7+ years), **Python**, **C**, and **C++**. Skilled in **Web Development** with both **server** and **client-side** knowledge. Just waiting for some challenging codes to solve. I've participated in various hackathons on the national level. I represented my school in various badminton tournaments. I am a team worker and I have the skills to manage a team and motivate each and every team member to work actively towards society. I've also participated in events held by several NGO's. I won many national level olympiads which was only possible because of my skills to complete the task which was assigned to me.

Employment History

Senior Core Committee Member, SIAMVIT, Vellore

NOVEMBER 2020

- Remained proactive and constantly took initiative to achieve desired outcomes.
- Brought forth excellent time management and multitasking skills.
- Functioned collaboratively with various partners.
- Organized and prioritized work to complete assignments in a timely, efficient manner.

Education

12th Standard, City Montessori School, Lucknow

JUNE 2018

I represented my school in various inter-state badminton tournaments. I participated in multiple national and international conferences and olympiads because of my team managing skills. I loved programming and so I spent most of the time in computer labs and was always eager to learn new concepts beforehand.

B.Tech, Vellore Institute of Technology, Vellore

JULY 2023

I participated in various hackathons which gave me a sense of the real world problems and their solutions. I actively participated in the conferences being held to support multiple NGO's. I am currently completing courses in computer science, data science, web development, and machine learning using python.
